

Homework 1: Find all errors and fix them

```
03_01_homework.cpp
1 #include<stream
2 using namespace STD
3
4
5 cout <<"work smart not hard\n";
6
7
8 int maIN() {
9
10
11 cout << "Children must be taught how to think, not what to think"
12 cout << "We worry about what a child will become "tomorrow", yet we forget that he is someone today\n";
13 cout << "Children are not things to be molded"<, but are people to be unfolded\n";
14 cout << "Each day of our lives we make deposits in the memory banks of our children."<<end;
15 cout << "<"It is easier to build strong children than to repair broken men"<<"\n";
16 cout >> "Children need models rather than critics\n";
17
18 out<<"Children have never been very good at listening to their elders, but they have never failed to imitate them";
19
20 cout < "Children are our most valuable resource\n";
21
22
```

The Correction :

line 1 → <iostream> not <stream

line 2 → std is capitalized and there is no semicolon

line 5 → the statement is outside the main function

line 8 → main function declaration is wrong

line 11 → there is a missing semicolon and \n

line 12 → tomorrow should be in a single quotation

line 13 → << not <

line 14 → endl not end

line 15 → there should be only one double quotation

line 16 → << not >>

line 18 → cout << not out<< and also a missing \n

line 20 → there is no return statement and the closing bracket of the main function is missed
